Think Before You Click!

I designed this cyber security awareness poster using a simple and clean layout. I selected a light blue background with dark blue and black text to maintain a professional and calm look. Blue color represents trust security which matches the theme of cyber safety. I used only two fonts to keep the design neat a bold font for title to make it eye catching , and a simple readable font for the body text. The title is large and placed at the top so it grabs attention quickly. I added a central lock and shield icon to visually represent protection and security. The content is short and easy to understand, using bullets points for clarity. Overall the design is balanced , readable , and follows all the basics principles.
